Cairo, Egypt

Summary

Specializing in SOC operations, network defense, and cryptographic systems. Experienced in Python-based secure software development and vulnerability assessment, and AI-driven security research. Passionate about applying technical and analytical skills to real-world cybersecurity challenges and contributing to innovative security solutions.

Education

New Mansoura University

Bachelor of Computer Engineering, Computer Engineering

Sep 2022 - present

GPA: 3.2/4.0

Experience

Roboleap Academy

Instructor

July 2026 - Present

New Damietta , Damietta

- Designed and delivered a 3-month Networking Fundamentals curriculum for students aged 12+, covering networking concepts and Cisco Packet Tracer.
- Developed 12 structured sessions with hands-on labs, quizzes, assignments, and progressive CLI exercises.
- Coordinated with academy staff and junior coaches to monitor student performance, attendance, and communication.

INSTANT

July 2025 - January 2026

SOC Analyst Trainee

New Cairo, Cairo

- Gained hands-on experience in SOC Tier 1 operations, including log monitoring, alert triage, and incident response
- Analyzed security events using SIEM tools and mapped detected threats to the MITRE ATT&CK framework
- Conducted Windows forensics, evidence acquisition, and basic malware investigation

Cybertalents

January 2026

CTF Competetion | Top 20 Ranking

Online

- Ranked among Top 20 participants in an international cybersecurity competition
- Solved advanced challenges in Cryptography, Digital Forensics, and Network Security
- Applied practical exploitation and analytical skills in simulated real-world scenarios

Projects

SOC Lab Implementation using Wazuh | *Wazuh SIEM, Windows Server, Kali Linux, Active Response, Log Analysis*

- Designed and deployed a full Security Operations Center (SOC) lab environment consisting of a Wazuh Manager, Windows Server agent, and Linux-based attacker machine
- Simulated credential-based attack scenarios to generate Windows Security Event ID 4625 logs and evaluated SIEM-based detection mechanisms
- Developed custom Wazuh correlation rules to identify brute-force behavior using frequency and timeframe thresholds
- Implemented automated Active Response policies to dynamically block malicious IP addresses and contain attacks in real time

Secure Password Storage & Management System | *Python, Cryptography, Fernet, PBKDF2HMAC*

- Designed and implemented a secure password manager using industry-standard encryption (Fernet) and key derivation (PBKDF2HMAC)
- Built an encrypted password vault with a GUI interface to securely store, retrieve, and manage credentials
- Applied secure authentication principles to protect sensitive user data against unauthorized access

Online Restaurant Management System | *PHP, MySQL, HTML, CSS, JavaScript*

- Developed a full-stack web application for managing client reservations, menus, categories, and inventory
- Implemented a secure login/logout system with hashed passwords to strengthen user authentication
- Designed role-based access logic to separate administrative and user functionalities

TETRIS AI | *Python, AI, Heuristics, Search Algorithms*

- Created an AI agent to optimize Tetris gameplay using reinforcement learning techniques
- Applied heuristics and search algorithms to improve decision-making efficiency and score optimization
- Evaluated agent performance through iterative training and gameplay simulations

Disease Prediction System | *Python, Machine Learning, Scikit-learn, Pandas*

- Designed and trained a machine learning model to classify diseases based on structured health datasets
- Performed data preprocessing, feature selection, model training, and evaluation
- Achieved accurate disease prediction using supervised learning techniques

Technical Skills

Programming Languages: Python, C, C++, JavaScript, Node.js, Bash, PowerShell, SQL
Tools: Wireshark, Snort, Metasploit, Burp Suite, FortiGate Firewall, Linux, Cisco Packet Tracer, Let's Defend, MySQL, NoSQL, Git, GitHub
Concepts: SOC Tier 1 Operations, Log Monitoring, Incident Detection & Triage, Incident Response, Threat Hunting, MITRE ATT&CK & MITRE ATLAS Framework, Networking, Fullstack Development, Agile, Prompt Engineering
Networking: CCNA Fundamentals, TCP/IP, VLANs, Routing (Static & RIP v2), Trunking, DNS, DHCP, VPN

Soft Skills

Languages: Arabic (Native), English (Fluent)
Soft Skills: Teamwork, Collaboration, Problem-Solving, Leadership, Adaptability, Time Management, Strategic Planning, Attention to details, Leadership, Fast-Learner, Creativity

Professional Certifications

SOC Analyst Diploma - INSTANT ↗	January 2026
Cybersecurity Academy - NTI ↗	September 2025
HTML,CSS, and JavaScript for Web Developers – Coursera ↗	August 2025
CCNA – Creativa ↗	September 2024
Computer Network Fundamentals - Maharatech ↗	June 2025
Machine Learning - Mansoura University(DTC) ↗	August 2024

Research & Publications

Quantum Cryptography in 6G Networks: A Deep Learning–Driven Security Overview - IEEE ↗	December 2025
Chaotic Cryptography: Foundations, Applications, and Integration with Quantum, IoT, and 6G - IEEE ↗	July 2026
